

The new sound of music
is you at the Hammond.

The great Hammond Organ heard in concert halls has now been re-designed...for your home!

New Model D-100 Series Hammond Organ: \$3895*

The instrument you see here is a new Hammond Organ . . . the D-152, first of our new D-100 Series. Yet every component has been taken, intact, from the famous RT-3 Hammond Organ, heard in many concert halls.

The great achievement here is that the whole sound system of the new D-152 is housed *within the organ cabinet*. No separate, remote tone cabinet is used, as required with the Hammond RT-3. The elegant Tudor cabinet is not one inch larger than the console of the RT-3. Yet the self-contained sound system is comparable in music power output to our largest and most deluxe tone cabinets.

If you have wished that you might have the greatest of all Hammond Organs, but hesitated because of space requirements, you can now be certain it will fit your home. See, and hear, the splendid D-152. Your Hammond Organ dealer will be glad to demonstrate it.

*Model shown is Hammond Organ D-152, in Walnut. Model D-155, in Light Oak, \$4005. All prices f.o.b. factory, subject to change without notice.
